SEWER FACILITY CONSTRUCTION REVIEW PROCEDURE REQUIRED FOR SEWER CONNECTION APPROVALS

Any new sewer connection with a designed project flow in excess of 400 gallons within the service area of the Authority requires the approval of the Authority Engineer. Any new sewer connection with a designed project flow in excess of 8,000 gallons within the service area of the Authority also requires the approval of the Authority Board and the New Jersey Department of Environmental Protection.

DOCUMENTS REQUIRED FOR REVIEW

-Two (2) copies of written application for construction of sewer facilities, includes 1)TWA-1, 2) WQM-006 and 3) WQM-003, if >8,000 g.p.d., and required attachments.

-Application fee = \$500.00

-Review Fee(\$) = 0.1 x (g.p.d. of discharge); minimum deposit = \$500.00
Maximum Initial Deposit = \$5,000.00

-Review Fee Surcharge(\$) = 0.04 x (g.p.d. of discharge)

The application fee and review fee surcharge are non-refundable. The review fee is a deposit to reimburse the Authority for the cost of review and subsequent fees may be required by the Authority for review of the application.

-Two (2) copies of Plans and Specifications for proposed connection.

- Plans shall include, but not be limited to, the following information:
- Name of Applicant
- Name of Project, if different from that of Applicant
- Name of Owner, if different from that of Applicant
- Block and Lot numbers on the current Tax Assessment Map
- North Arrow
- Date of preparation of map and revision dates
- Graphic scale and reference median
- Details of methods to minimize infiltrations and inflow and water conservation measures
- Floor plans indicating units and/or use of proposed space
- Proof of compliance with pretreatment program

Sewer connection review shall be acted upon within 45 days of the date of submission of a complete application to the Authority, or within such further time as may be consented to by the applicant.

Upon approval, a connection or tapping fee of \$4,631.00 per service unit shall be paid to the Authority.

The number of service units is determined by the following formula:

$$\frac{\text{Average daily flow of sewage for the connector}}{\text{Avg. daily flow of sewage for avg. single fam. residence (300gpd)}}$$
